

Smart PDF Generator — Feature Overview

Complete documentation of capabilities

Introduction

Smart PDF Generator is a production-ready, full-stack PDF creation platform built with Node.js, Express, and PDFKit. It supports 5 professional templates, real-time preview, watermarks, QR codes, and digital signatures.

Supported Features

The platform supports custom documents, professional resumes, business invoices, achievement certificates, and comprehensive business reports — all generated server-side in under 2 seconds.
